JOURNAL OF SCIENTIFIC COMPUTING

Volume 18, Number 1 February 2003

CONTENTS

AMR vs High Order Schemes 1
Leland Jameson

Handling Geometric Singularities by the Mortar Spectral Element Method I. Case of the Laplace Equation 25
Nejmeddine Chorfi

Visualization and Genetic Algorithms in Minimax Theory for Nonlinear Functionals 49
Liu Xiyu, John Frazer, and Ming Xi Tang

An Improved Quadrature Rule for the Flux-Computation in Staggered Central Difference Schemes in Multidimensions 69
Knut-Andreas Lie and Sebastian Noelle

Strong Stability Preserving Properties of Runge–Kutta Time Discretization Methods for Linear Constant Coefficient Operators 83
Sigal Gottlieb and Lee-Ad J. Gottlieb

On the Conservation and Convergence to Weak Solutions of Global Schemes 111
Mark H. Carpenter, David Gottlieb, and Chi-Wang Shu

Boundary Procedures for Summation-by-Parts Operators 133
Ken Mattsson

JOURNAL OF SCIENTIFIC COMPUTING

Volume 18, Number 2 April 2003

CONTENTS

On the Definition of Surface Potentials for Finite-Difference Operators 155
S. V. Tsynkov

Shifted Chebyshev Collocation Domain Truncation for Solving Problems on an Infinite Interval 191
Huiyuan Li and Heping Ma

High Order Finite Difference Approximations of Electromagnetic Wave Propagation Close to Material Discontinuities 215
Jan Nordström and Rikard Gustafsson

Parameter Estimation in Two-Dimensional Space by Mixed Chebyshev–Legendre Approximations 235
YongHoon Kwon, Ben-yu Guo, and Ki-Hyun Cha

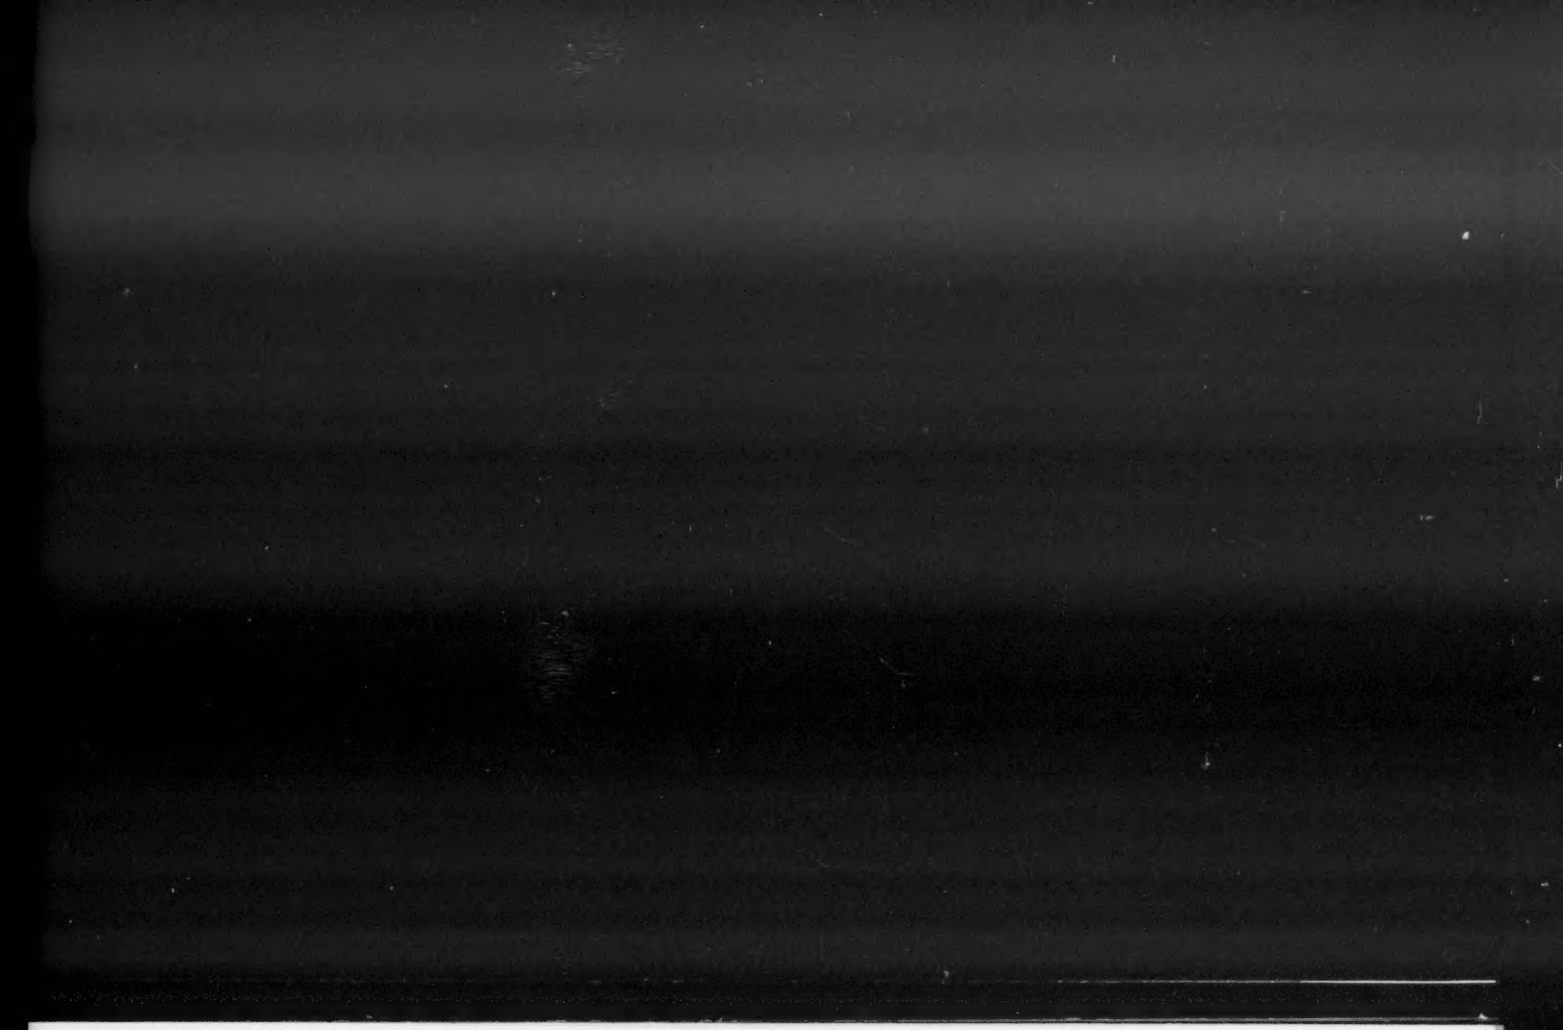
A Fourth Order Scheme for Incompressible Boussinesq Equations 253
Jian-Guo Liu, Cheng Wang, and Hans Johnston

Stability of Gauss–Radau Pseudospectral Approximations of the One-Dimensional Wave Equation 287
Z. Jackiewicz and B. D. Welfert

JOURNAL OF SCIENTIFIC COMPUTING

Volume 18, Number 3 June 2003

CONTENTS

Chebyshev Collocation for a Convective Problem in Primitive Variable Formulation 315
H. Herrero, S. Hoyas, A. Donoso, A. M. Mancho, J. M. Chacón, R. F. Portugués, and B. Yeste


Degenerate Two-Phase Incompressible Flow IV: Local Refinement and Domain Decomposition 329
Z. Chen and R. E. Ewing
